

Practice & Reflect Rubric

Please use this rubric as a guide for writing your reflection. Your reader will use this rubric to determine whether you have successfully completed this module by (a) trying new teaching techniques, (b) fully reflecting on the successes and challenges you experienced or may have experienced, and (c) sharing next steps for implementing a module technique in the future.

Criteria	Complete: 3 pts.	Developing: 2 pts.	Beginning: 1 pt.	Not Addressed: 0 pts.
Reflection identifies successes and provides supporting evidence	<p>The reflection:</p> <ul style="list-style-type: none"> (a) explains how the technique from the module was implemented, (b) describes what went well during the use of the technique, and (c) includes student responses and/or reactions that indicate the technique was a success. <p>If the technique tried did not lead to any successes, the reflection:</p> <ul style="list-style-type: none"> (a) names the technique and explains how it was implemented, (b) describes the positive outcomes you expected, and (c) lists at least one strategy that could be used to improve the outcome. 	<p>The reflection:</p> <ul style="list-style-type: none"> (a) explains how the technique from the module was implemented and (b) either describes what went well during the use of the technique or includes student responses and/or reactions that indicate the technique was a success. <p>If the technique tried did not lead to any successes, the reflection:</p> <ul style="list-style-type: none"> (a) names the technique and explains how it was implemented and (b) either describes the positive outcomes you expected or lists at least one strategy that could be used to improve the outcome. 	<p>The reflection explains how the technique from the module was implemented.</p>	<p>The reflection does not discuss a technique from the module.</p>
Reflection identifies challenges and provides supporting evidence	<p>The reflection:</p> <ul style="list-style-type: none"> (a) describes any challenges that emerged while implementing the technique, (b) explains what may have led to those challenges, and (c) provides examples of student responses and/or reactions. <p>If the technique tried did not lead to any challenges, the reflection:</p> <ul style="list-style-type: none"> (a) describes possible challenges that may arise when using the technique and (b) includes reasons why these challenges may occur. 	<p>The reflection:</p> <ul style="list-style-type: none"> (a) describes any challenges that emerged while implementing the technique and (b) either explains what may have led to those challenges or provides examples of student responses and/or reactions. <p>If the technique tried did not lead to any challenges, the reflection describes possible challenges that may arise when using the technique.</p>	<p>The reflection identifies the challenges that emerged while trying the technique.</p> <p>If the technique tried did not lead to any challenges, the reflection includes a broad challenge that is unrelated to the implementation of the technique.</p>	<p>The reflection does not identify challenges with the implementation of the technique.</p>
Reflection includes next steps for continuous improvement	<p>The reflection:</p> <ul style="list-style-type: none"> (a) lists next steps to be taken to implement a technique from the module, (b) explains why these steps are being taken, and (c) provides a time frame for taking the steps. 	<p>The reflection:</p> <ul style="list-style-type: none"> (a) lists the next steps and (b) either explains why these steps are being taken or provides a time frame for taking the steps. 	<p>The reflection includes broad next steps that are partially connected or not connected to module techniques.</p>	<p>The reflection does not include next steps for implementation.</p>

NOTE: Participants earn a badge for a module with a reflection that is complete in all three categories.
