

## Critical Learning Template

The Critical Learning Template can be used to identify the most important learning outcomes (what students will know and be able to do) by noting whether they meet each of the “real” criteria.

- **Readiness:** Which standards are required for students to experience success in the following module, unit of study, or course?
- **Endurance:** Which learning standards will students continue to use throughout school, career, and life situations?
- **Assessment:** Which learning standards will be assessed for future decisions such as job certifications or entrance into programs?
- **Leverage:** Which learning standards are applicable across a number of content areas or will be used in other assignments, tasks, or careers?

Critical Learning Outcomes	Readiness	Endurance	Assessment	Leverage
